1. Money Toad Miner

At its core, Money Toad the feng shui money frog, better known as the **three-legged toad**, is a popular Chinese symbol that is used as a feng shui adjustment to attract wealth and prosperity. The three-legged toad is also connected to long life and good luck.

We are bringing the auction fun and FOMO with a huge ecosystem to the Binance Smart Chain.

Money Toad Miner is designed for individuals with a long-term vision. It is not for those who want instant profits that ultimately harm others.

Whitepaper

1. Money Toad Miner

Toads can be viewed as internal tokens whose value rises and falls based on the combined actions of the community, just like any other coin or token that you may hold. But, unlike your average coins and tokens, Money Toad allows you to stabilize and increase your TVL by taking long-term advantage of its compound feature.

Whitepaper

2.Sustainability

Money Toad is sustained by continued community support and highly professional marketing strategy that is used by our SMM-Specialist Team. Money Toad also has an algorithm that doesn't allow others to instantly dump their coins on the community and no token that can be dumped. It also allows you to stabilize and increase your TVL by taking long-term advantage of its Re-Pet feature.

Whitepaper

3.TVL

TVL is your current estimated "**total value locked**", an estimated value of your total Toads. Once you Pet Toads, they work for you indefinitely, therefore your TVL can not be withdrawn in one lump sum. When you pet toads, they fill your barrel with BNB throughout the day with an estimated daily total of **12%** of your TVL. You can Re-Pet or withdraw the BNB accumulated in your barrel at any time. Withdrawing too often will ensure a decrease in TVL, which in turn will ensure a decrease in your daily payouts.

Whitepaper

3.TVL

The value of Toads continuously increases and decreases throughout the day, therefore it is normal to see your personal TVL fluctuating as your barrel continues to fill.

Whitepaper

4.Refferral System.

Once your BSC wallet is connected to the Money Toad website, you will notice your referral address appear at the bottom of the page. When a new user pet toads after clicking your personal referral link, the contract will instantly send a BNB value equal to **15%** to your wallet. When a user reinvests in Money Toad, you also get a **15%** reward. Be smart, use it to Pet Toad.

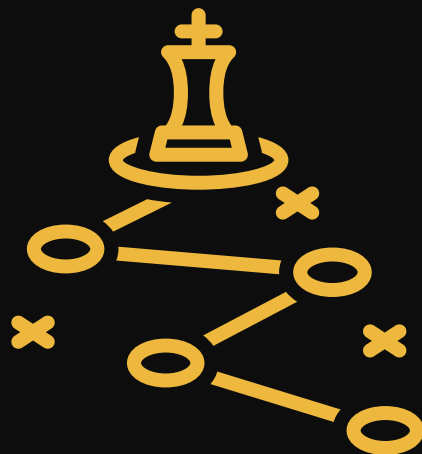

Whitepaper

5.Strategy

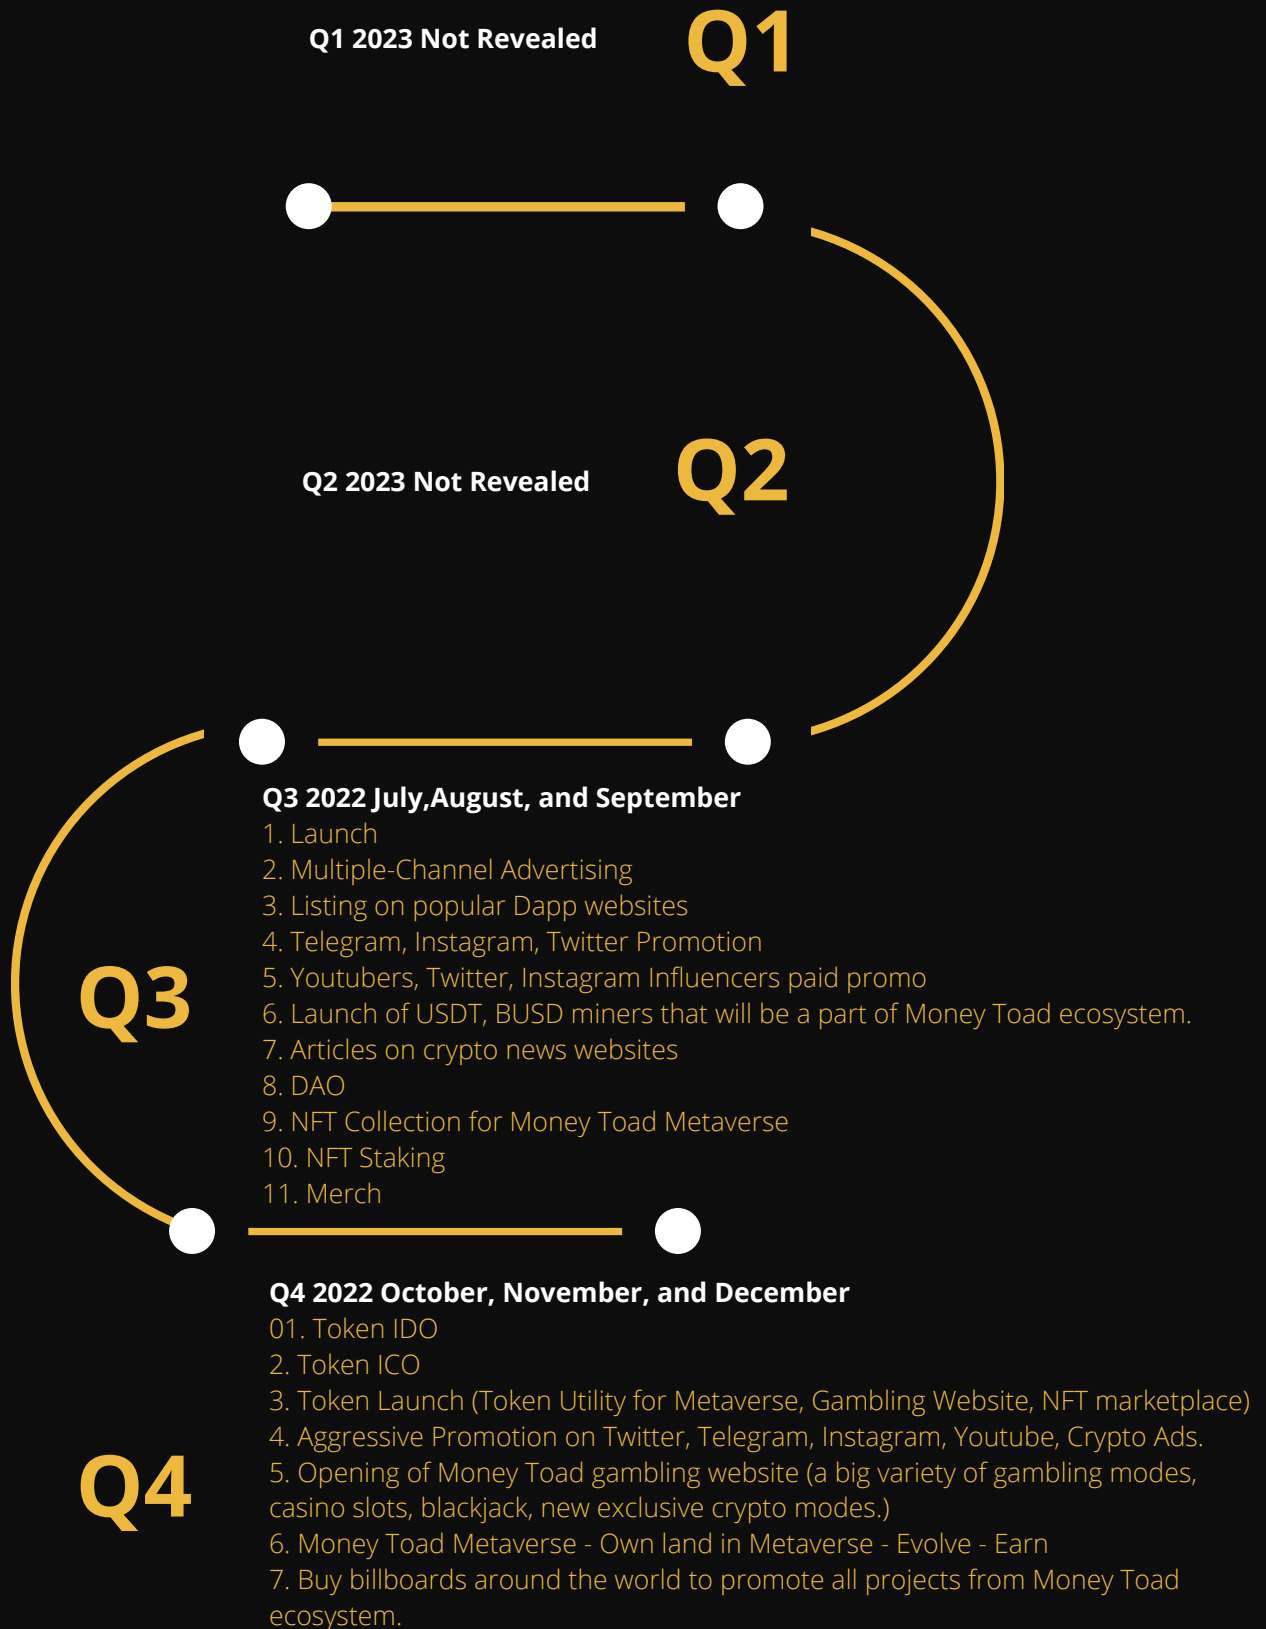

There are many strategies, but the most proven high yield strategy in such projects is:

- when users reinvest (re-pet) **6 times a week** and withdraw the reward on the **7th** day. Experience shows that this is the best well-known strategy for keeping a sustainable contract TVL and generate the maximum profit.

8.Web 3.0

If you've been following the social networking platforms, you've noticed about social network dangers. Because of privacy and security concerns, traditional social networking sites have always been in the spotlight. Social platforms have revolutionized the way people communicate. Yet, they have taken control over users' data and, as a result, they can control any firm that runs a decentralized social networking site. Popular social networking platforms keep tabs on their users' activities. Not only that, but such platforms sell the aggregated data to the winning price to provide more useful targeting for branding and marketing goals. Because all platforms, including Facebook, Twitter, and others, are centralized, they can fully utilize the content of their users. So, here is the link of our WEBSITE, **EN** Telegram Community and **CN** Telegram Community.

Whitepaper

9. Developing Team

A team of highly experienced blockchain/web3 developers and SMM-Specialists are aiming to create a long term project with a big ecosystem.
